

100 Semi-automatic Aerosol Water Bath Leakage Detecting Machine

The water bath machine is dedicated to testing the leakage of aerosol products. It helps to reduce defective rate of aerosol production. The working principle for the water bath system is simple. We use auto temperature control and permanent magnet at the bottom of the water bath tank, so it becomes more reliable to use.

What's more, we offer an automatic drying system after the water bath procedure. This helps the customer to package the final aerosol products for either metal can or non-metal container

1 water bath test tank 2 flameproof heating rod 3 explosion-proof control cabinet

main technical specifications

Suitable for aerosol cans (Special specifications can be customized)	Height(mm)80-330
Working pressure (Mpa)	0.65-1
Power supply voltage	AC380 V 50HZ
Temperature control range	±1℃
Explosion-proof electric heating power (Kw)	6
Gas consumption (cubic / min)	0.2
Machine dimension (mm)	2000x460x700
Productivity (tanks/hour)	600
